2021/07/16

Product Information □ 1. Shield mobile phone signals: It is suitable as an information security bag for mobile phones and has the function of "mobile phone rest bag". For example, if a mobile phone is placed in the inner layer of an information security bag, the mobile phone will be strictly protected. The mobile phone itself will "sleep", at this time the mobile phone is not controlled by any remote control device. When someone calls your mobile phone, you will receive a prompt that the user you called is temporarily out of the service area. 2. Anti-demagnetization: Various types of memory cards, electronic products with storage media, etc. are placed in the mobile phone security bag, which can protect the data information stored therein, eliminate static electricity, reduce the interference of electromagnetic fields on the stored content, and prevent data loss. If you put the bank card in the information security bag, you can prevent the signal of the mobile phone from demagnetizing the bank card and the trouble of eliminating the tape. 3. Anti-electromagnetic radiation: Put the mobile phone into the safety bag, when placed in the opening, it can prevent the electromagnetic radiation of the mobile phone and protect the health of the body.
